Stella Searston, RM SME¹, Ted Eggleston, RM SME, and Todd Wakefield, RM SME.

Regulation S-K 1300 and other regulatory codes often make reference to industry-accepted or industry best practices as being precedents that Qualified Persons should be aware of, and consider, when preparing scientific and technical information for public disclosure.

The following pages provide a list of publicly-available texts and publications that can provide examples of industry-accepted practices. Most from the Society of Mining, Metallurgy and Exploration (SME) and the Australasian Institute of Mining and Metallurgy (AusIMM) will require purchase; however, a number of the publications under “Other References” can be downloaded from the internet.

Society for Mining, Metals and Exploration (SME)

The SME provides a catalogue, updated annually, of all publications available through the SME bookshop. This is available at <https://www.smenet.org/publications-resources/store/sme-book-catalog>.

Note in the following subset of the SME bookstore catalogue, “bundle” refers to an option to purchase that includes both paper and e-publications at a special price.
